

## **Mandatory District Field Entry In MSPO Trace System**

To improve transparency in MSPO Trace and address stakeholder requests for district-specific data, MPOCC has enhanced the mandatory data entry by making it necessary to input districts in the MSPO Trace system. This initiative aims to enhance transparency and simplify the tracking of certified entities within specific districts. Certification Bodies (CBs) must now input the district for each entity location, rather than using the district area of the headquarters.

The implementation of this circular began on February 9, 2024, and all Certification Bodies are mandated to comply with it. If you have any questions about this circular, please send your inquiry(s) to [mtt@mpocc.org.my](mailto:mtt@mpocc.org.my).
