## **PUBLICATION OF THE WEB-BASED INTRODUCTORY MSPO GHG CALCULATOR AND EXTENSION OF THE SUBMISSION DEADLINE FOR 2025 REPORTING**

Dear Valued Stakeholders,

Kindly refer to the below information and update:

### **1. Web-Based Introductory MSPO GHG Calculator**

To support the full implementation of the MSPO GHG requirements in the MSPO Standards series under Indicators 4.5.4.2 and 4.5.4.3, MSPO has converted the Excel-based Introductory MSPO GHG Calculator into a web-based system within the e-MSPO platform.

The Web-Based Introductory MSPO GHG Calculator has been developed to assist MSPO-certified entities under MSPO Part 3-1, Part 3-2, Part 4-1, and Part 4-2, particularly those facing difficulties accessing the Excel calculator. The web-based version also serves as the official MSPO GHG reporting tool within the e-MSPO system.

The full implementation of the **Web-Based Introductory MSPO GHG Calculator in the e-MSPO system will take effect on 16 March 2026**. Prior to this date, relevant MSPO-certified entities may continue to submit their GHG emissions reporting using the Excel-based calculator via the e-MSPO system.

Entities that have already submitted their GHG emissions reporting using the Excel-Based Introductory MSPO GHG Calculator are not required to resubmit their MSPO GHG reporting using the web-based calculator.

The web-based calculator has been designed in alignment with the structure and format of the Excel-based calculator. Therefore, certified entities may refer to the previous MSPO GHG Calculator training materials or user manual when completing the web-based calculator.

## **2. Extension of the Submission Deadline for 2025 Reporting**

In reference to Clause 3.2 of the MSPO GHG Procedure, the reporting period shall cover a twelve (12)-month cycle ending on 31 December of each year, and the submission shall be made no later than 31 March of the following year.

As 2026 marks the first year of implementation, and in conjunction with the publication of the Web-Based Introductory MSPO GHG Calculator, it is essential to provide MSPO Certified Entities with sufficient time to familiarise themselves with the new system and to ensure that MSPO GHG emissions reporting is submitted with accurate and credible data.

In this regard, MSPO has decided to **extend the submission deadline for the 2025 reporting year from 31 March 2026 to 30 April 2026**. This extension provides additional time for all MSPO Certified Entities under the relevant MSPO Parts to complete and submit their MSPO GHG reporting.

Please note that this extension applies only to the 2025 submission reporting. Subsequent reporting years shall adhere to the timeline stipulated in the MSPO GHG Procedure, unless otherwise notified through official updates or announcements by MSPO.

The MSPO GHG requirements in MSPO Standards series under Indicators 4.5.4.2 and 4.5.4.3 shall be fully comply by MSPO Certified Entities before 30 April 2026 and audited by Accredited Certification Bodies (ACBs) after 30 April 2026.
